# THE NEW FLEET MANAGEMENT

The MyMagni subscription is free for the first 3 years for every new machine.

**MyMagni is a new GPS** device Magni Telescopic Handlers installs on each machine in order to provide to the customers a 360° view of their fleet. This complete telematic system helps not only geofencing and controlling each machine, but also checking the most important parameters of the engine and security devices.

Additional sensors intently screen your machine information and monitor all the things that you can't see. Technicians are informed of issues that occur on site immediately to forestall breakdowns, cutting extra startling expenses, and most importantly limiting downtime. Be the first to know anything about any machine in your fleet and keep an eye over all activities in real time. MyMagni is the best solution to help you keep your fleet up and running at all times.

## Report significant machine activities:

### ENGINE

- Engine Hours / Total Vehicle Hours
- Engine Total Fuel Used
- Engine Coolant Temperature
- Engine Oil Temperature
- Engine Oil Level
- Engine Oil Pressure

### SAFETY

- Alarm Code Error from LMI

- Current Length of Boom
- Current Height of Boom
- Actual Load
- Max Load
- Machine Load
- Max Load Capacity
- Boom in motion

## MACHINE CHECK-UP

- Vehicle Speed
- Travel Direction
- Gear Inserted
- Working Mode
- Tool configuration
- Urea Level
- After treatment Diesel Exhaust Fluid Tank Level
- Battery Voltage
- Ignition Status

## MAINTENANCE SCHEDULING

- Hours to Maintenance

Magni after sales staff and technicians are in contact on the spot whenever issues emerge (alert or damage) thanks to the Manager Dashboard chat feature. Furthermore, a timeline display charts the daily routine of any machine in your fleet and provides quick access to active alarms as well as upcoming services. Your machine will be prepared for pre-check made straightforward and simple. It's the big picture for all fleet map position. You can also check directly on a mobile phone your fleet/machine thanks to an App usable both on Ios and Android devices. Leave burglary not an option with this additional layer of security. Screen all movement inside a customized geofence and have a sense of security informing you if your machine leaves your predetermined region.

**Safety is everything for the Magni Team!**
