# Machine Specifics

A deep dive into each machine

Machine and sensor-related data like daily utilization reports, CAN fault codes, damage reports, failed inspections, and overrun services makes it easy to pinpoint what's triggering a need for attention alert.

Follow-up questions are easily communicated through instant chat. Fleet managers can quickly talk about specific machine issues, causes and solutions with machine operators and service technicians.

# From Big Data to Real Insight

Make better decisions

MyMagni brings you a ton of telematics data, analytics, and visualization, nicely displayed and packaged together in clickable, readable, dynamic charts.

Through data-driven analysis, you have a full understanding of your entire fleet and every machine in it. With this knowledge, you can streamline operations and increase productivity, profitability and brand value. You can have it all.

# Stay on Top of Fleet Activity

Always know what is happening with your fleet

Map and track every movement, anywhere. With this level of security, you always know where your machines are and what they are doing. MyMagni offers high-level insight into fleet health, efficiency and safety – even custom KPIs.

Know the what and whys of your equipment through customizable dashboards - the details, data visualizations and analytics are there to see what matters to you most and lets you get the best use out of your machine.

Did you know...

Trackunit Manager is built in a two-way split. In just a click, you can jump from the new MyMagni to Classic through the menu shortcut.
